

Retail Display Movement Solutions

Our clients tell us that using movement in retail and exhibition environments helps them to increase interest and to sell more products. From small, lightweight Point-of-Sale display turntables for short term use, to larger turntables designed for durability and reliability over many years, Movetech UK has a turntable to meet your needs.

Window and interior displays * Signage * Showrooms * Exhibitions/events * Product launches

Revolving Stages

In the retail and exhibition industries movement adds a dynamic dimension to product display. For the events, film and TV industries a Movetech UK revolving stage can create spectacular film sequences or TV commercials. They can also be used to create impressive product launches and reveals by moving the audience or the merchandise as required.

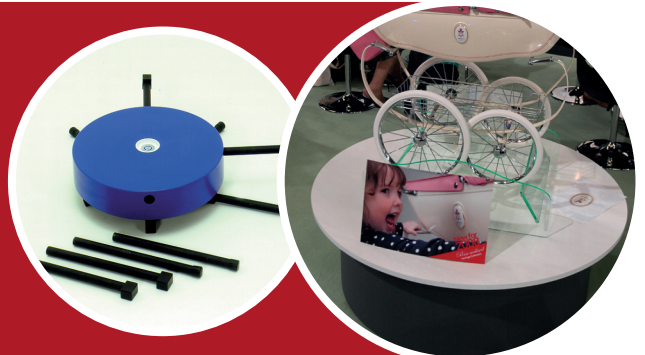

Maxi Carousels

Introducing movement from Movetech UK to the showroom will bring the excitement of an exhibition to the sales floor, helping to attract customers and increasing sales. Our larger carousels will allow you to create stunning displays with lots of impact.

Mini Carousels

Our Mini Carousel turntables are well suited to generating simple, full circular platform displays. They can also be combined with other movements in our range. For instance, imaginative lighting effects, to create something really special that stops customers in their tracks.

Small Carousels

Our small carousel range includes the Mini Carousel, B25 range and B200 range. The B25 range is a fully finished, versatile and reliable mains powered turntable range, ideal for creating compact window or counter displays. The B200 range offers heavier duty display turntables suitable for more substantial displays.

Revolving Signs

A revolving sign mechanism from Movetech UK can give you the competitive edge. Ideal for a wide variety of locations, both indoors and out, a revolving sign will attract attention, whether inside a shopping mall, an exhibition or on top of a multi-storey building.

PoS Motors

Our range of mains and battery powered PoS motors includes oscillating, up and down and pendulum movements. They come in a wide variety of sizes and speeds to help you create eye-catching displays and special promotions.

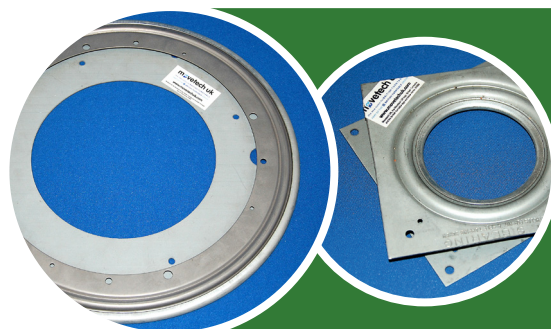

PoS Turntables

Movement acts as the ideal mechanism to increase sales (POPAI research suggests by up to 30% over a static display). Whether you are displaying the latest brands or high value goods, a battery-operated solution will allow you to create an attractive solution wherever it is needed.

PoS Movements

Our wide range of mains and battery powered movements are great at attracting interest in short term brand promotions, new product launches and exhibitions. They are easy to incorporate into display, adding excitement and catching the eye.

Manual Bearings

Manual turntables are suitable for static displays that require additional manual rotation. Our wide range of long lasting manual turntables incorporates a variety of sizes, all carefully designed and built to ensure smooth and effortless movement.
